## Precision .22 Competition, 13 January

This was the first competition of the 2013 series.

Theoretically it's a nice easy competition to start the year with, just ten shots on a PL14 target, no time limit and as many sighters as you want.

The problem is that it's shot standing unsupported at 25 yards and everyone wobbles!

The Competition Officer supplied 21 targets. He got two back that hadn't been used and thirteen that had been shot. So either someone pinched six targets or there were six shooters who were totally disgusted with their result!

The Competition Office is willing to take bets that the winner fired all of his shots before anyone else got two off!
