## Precision Rifle Results

25 January

The competition was shot by 18 members during the club session on Sunday and Wednesday. It was shot at 25m, standing unsupported with most using scoped semi-autos.

A lot of enthusiasm plus barracking was the order of the day, there had to be as it was freezing! Despite the conditions the scores were very close.

Rob F displayed his university credentials by shooting it at 50m instead of 25m, hopefully maths isn't part of his degree course. To be fair the scorer scaled down his shots by halving the spread of the shots. He still didn't win, maybe he had too long to shoot the card in.

Keith M was leading until a very late entry from Jim S (A full week late) pipped him by a point. However as the card wasn't dated or signed and there were no witnesses signatures he is looking at disqualification by the scorer (Keith M).

Lots of entries for this event, so keep 'em coming for the rest of the year's competitions.
